SV30 SuperVac

HIGH SPEED VACUUM SANDER

OVERVIEW

Introducing the all NEW SV30 SuperVac Slow Speed Sanding Machine.

Equipped with a powerful 400 watt long life motor fitted into a hospital grade vacuum canister and by-pass dust separator for superior dust extraction.

Operate in comfort with the ergonomic height adjustable handle while the dust vacuum system keeps your working environment clean without the need for an additional vacuum.

Fitted with additional weights to increase downward pressure for improved sanding results and efficiency.

All Australian designed and built.
