The new generation SV30 High Speed Supervac Sander diligently crafted to save time and labour efforts

Versatile Machine - can be used as a vacuum sander, a scrubber or a stripper

The Supervac Vacuum Sander can be used for scrubbing or stripping applications after switching off the vacuum motor, hence get multiple jobs done with just one versatile machine – That's increased productivity using intelligent design.

Ultimate gearbox reliability

Equipped with a long life triple planetary gear drive and universal clutch system that helps to increase productivity.

Meticulously crafted using ergonomic design

Fully compliant with Occupational Health and Safety requirements this machine is thoughtfully built using ergonomic design suggestion, safety triggers and fully adjustable handles.

'Cyclonic' dust separator

This machine is armed with a 400-watt long life motor fitted into the dust canister supported by-pass dust separator for superior dust extraction, hence no more indoor dusty mess and breathe easier after completing your sanding job.

Improved downward pressure

This sander is fitted with extra 3kg weight, hence offers ideal downward pressure to ensure sanding work is done effectively. This allows the sanders to offer high performance required to satisfy the rigorous demands of floor sanding applications.

Floating skirt traps dust and eliminates secondary vacuum

Dust free floors with the Polivac's full wrap around skirt and powerful 400-watt vacuum motor.
